Great Sky Solar located at 29 Mill Street is seeking approval from the Redevelopment Board to install a wall sign in the R7 zoning district. This sign deviates from the sign by law in section 6-34 subsection (10) in that the sign will be mounted 13 and 1/2 feet above grade where 6 feet is the maximum specified. Also, the sign square footage is 24.1, where 20 is the maximum. It is worth noting that the square footage here is calculated by multiplying the overall height of 3'-8" by 6' 6-7/8" which in this case, includes a considerable amount of negative space due to the shape of the sign.

Due to the architecture of the building this higher sign height is necessary for the sign to be visible to vehicular and pedestrian traffic. The entrance has a large glass awning that would prevent traffic traveling south on Mill Street to see the sign at a lower height.

The front yard of the property is only 13 feet deep and includes a two large bushes. For those reasons, an appropriately sized freestanding sign would not be beneficial to the business or the towns interests.

This sign will not detract from the use and enjoyment of proposed building or surrounding buildings. The sign will be beneficial to the public by clearly identifying the business and safely guide customers to the location.
